Profile	SHP	m/m ²	m/m ³
	45 x 27	45 x 27	822
	45 x 42	45 x 42	528
	45 x 68	45 x 68	326
	45 x 92	45 x 92	241
	45 x 140	45 x 140	158
Species:	Scandinavian Pine		

Length: 1.8 - 5.1 m

Thermal modification is a 100% natural method for increasing the durability and dimensional stability of wood, likewise for reducing water absorption. During the process, the wood is heated to a temperature of 180-220°C, while lowering the mois-ture content of the wood up to 4-6 %. Thermoarena conducts careful quality control of the wood before and after thermal modification. The lumber used for TM is checked and certified

Please follow Thermoarena's installation instructions when working with thermal wood
